DETAILED ACTION

Claim Rejections - 35 USC § 102/103

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 11-18 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, 35 U.S.C. 103(a) as being unpatentable over Hauber et al. (USPN 4,033,918), Gleichenhagen et al. (USPN 4,413,082), Allbright et al. (USPN 4,492,724), Hanninen et al. (USPN 4,992,501 or Czech (DE 4432368), for reason cited in the previous action.

Response to Arguments

4. Applicant's arguments filed 04/05/2005 have been fully considered but they are not persuasive.
5. Regarding the argument that "Allbright discloses ... the presence of a water-incompatible solvent", applicant's product is claimed as being in a dry state. As "in dry

Art Unit: 1713

state" does not require any solvent, there is no distinction between the present product and that of Allbright. The product is the same as, or an obvious variant of, the presently claimed product absent evidence that the particular process of making results in a materially different product. Even though product-by-process claims are limited and defined by the process, determination of patentability is based on the product itself. The patentability of the product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is even thought the prior product was made by a different process. See *In re Marosi*, 218 USPQ 289 (Fed. Cir. 1983) and *In re Thorpe*, 227 USPQ 964 (Fed. Cir. 1985). See also MPEP § 2113.

Regarding the inherence of the water solubility properties, contrary to applicant's suggestion, it is not simply a matter of random possibilities. The properties/characteristics of the composition necessarily flow from its make-up. In this case, support for the inherence of the properties is that the PSA compositions of the prior art are essentially the same as applicant claim PSA composition.

6. Applicant's arguments regarding whether or not the modified resins of Gleichenhagen et al., Hanninen et al. or Czech are or are not "polymers" (in the classic sense) are moot since applicant is claiming a "water-insoluble *component* B" and NOT a "water-insoluble *polymer* B. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

7. Regarding Hauber et al., applicant's argument that "[d]ioctylphthalate is not a polymer," the examiner fails to see how this has any relevance to the present rejections of the claims. Applicant's arguments do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
